

RANNIE 160T / GAULIN 160T

HOMOGENISER

The APV® Rannie 160T / Gaulin 160T homogeniser is a robust, positive displacement triplex, reciprocating plunger pump, equipped with an application-specific homogenising valve assembly with hydraulic actuation for precise control and performance.

The compact powerful machine is designed for a wide range of applications in the dairy, food and beverage, pharmaceutical, chemical and industrial industries.

Benefits

- Versatility and flexibility: The new models are designed for a wide range of applications.
- Long service life with minimal maintenance: Durable, slow-speed power end that minimises vibration and noise. The transmission also includes an internal gear transmission and enhanced oil treatment and cooling system.
- Wide array of configurations: The updated models include options such as pharmaceutical-grade specifications and explosion-proof designs, providing a larger range of uses and more specialized applications.
- User-friendly operator and service interface
- Choice of liquid ends: Select a Gaulin Monoblock or Rannie three-piece valve housing

Standard Features

- Gaulin Monoblock or Rannie three-piece liquid end
- Ball or poppet pump valves
- Pressure gauges
- Pressure relief valve
- Weld-stub product connections
- 3-A sanitary design in stainless steel or duplex materials
- Hard metal coated long life plungers
- Hydraulic valve actuator for smooth and stable control
- Single or two stage homogenising valve, to meet your application requirements
- Internal gear transmission
- Sanitary all welded frame
- Oil cooling system with external plate heat exchanger and temperature transmitter
- Oil filter including alarm
- All equipment wired to stainless steel control cabinet
- Emergency stop
- Set of tools
- Set of packings

Standard Options

- Homogeniser or pump
- Manual or automatic hydraulic control system
- Pulsation dampener(s) on inlet and outlet, suitable for CIP
- Aseptic cylinder design, SIP compatible
- Alternative product connections e.g., tri-clamp, high-pressure outlet, dual inlet
- Inlet pressure gauge
- Outlet pressure gauge or transmitter
- Water saving serial plunger lubrication
- Plunger lubrication control package
- Energy saving Micro-Gap homogenising valve
- Various homogenising valve configurations
- Ceramic plungers
- Choice of materials for cylinder bloc, pump valve, homogenising valves, packings, etc.
- Control cabinet with PLC or relay operation
- Main motor external cooling fan
- Start/stop buttons
- Enhanced spare parts kit

Other Options on Request

- Various liquid end block designs for special applications
- Actuated pressure relief valve
- Vibration sensors
- Explosion-proof design
- Electro-polished wetted parts
- Surface finish report
- UFO – Oil Filtration system
- Documentation packages for material traceability, certification and cGMP support

RANNIE/THREE-PIECE VALVE HOUSING POPPET AND BALL TYPE VALVES

TYPE	CAPACITY		PRESSURE

8.7 *	2,380	9,000	8,700	600

*Ball Valve only

TECHNICAL SUMMARY

Gross Weight	13,230 lb / 6,000 kg
Net Weight	12,565 lb / 5,570 kg
No. of Plungers	3
Lubrication Water Flow Rate	39.6 gal/hr / 150 l/h 13.2 gal/hr / 50 l/h**
Cooling Water Flow Rate	39.6 gal/hr / 150 l/h
Oil Volume	26.4 gal / 100 L

** with Serial Lubrication Option

DIMENSIONS (L x W x H)

Standard Machine	120 x 75 x 68 in / 3,060 x 1,910 x 1,720 mm
Packed on Pallet	148 x 86 x 83 in / 3,750 x 2,180 x 2,120 mm
Packed in Crate	148 x 86 x 93 in / 3,750 x 2,180 x 2,360 mm
Packed Volume	681 ft ³ / 19.3 m ³

Note: Actual dimensions and weight depend on configuration.
